Smart Government:
Architecture & Application

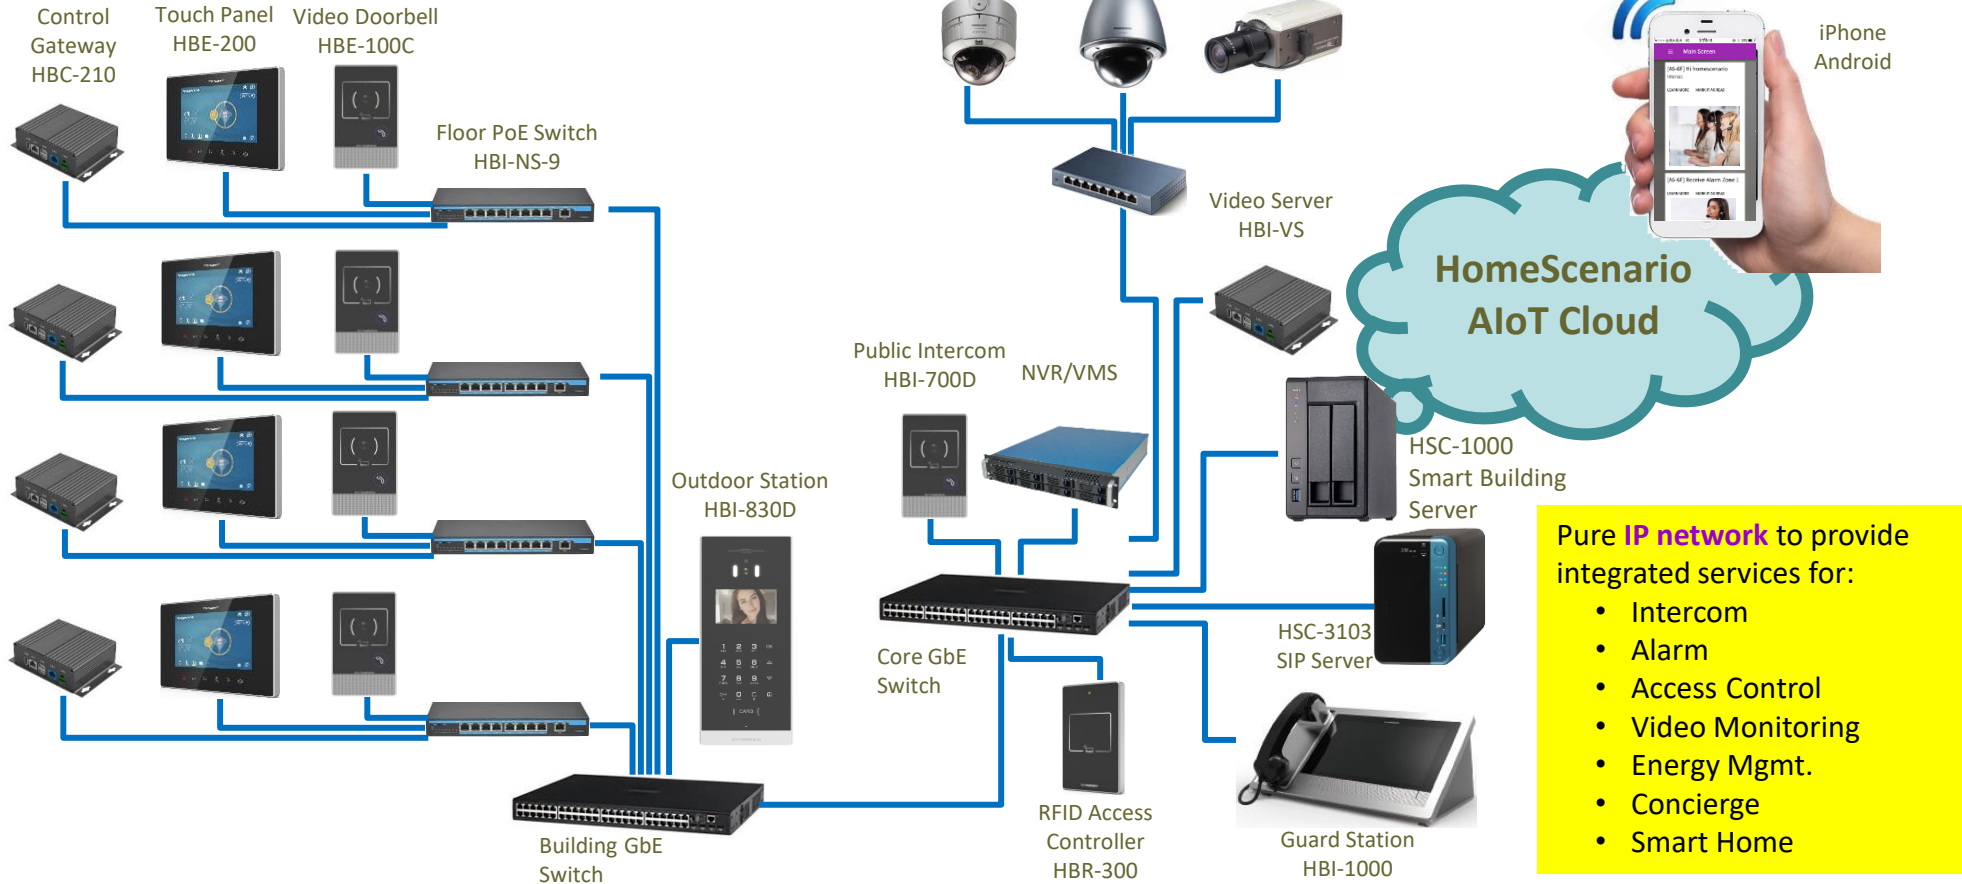

homescenario

Smart home made easy!

Demands for Smart Government

- **Peace-of-mind:**
 - *Secure* (protecting people and assets, alarm notifications)
 - *Green* (energy saving, eco-friendly)
 - *Convenient* (ease-of-use, higher productivity)
 - *Comfort* (faculty/students satisfaction, quality of working)
- **Unified communication:**
 - Integrated intercom and telephone
 - Message and concierge service
- **Everything under control:**
 - Lighting, dimming
 - Motorized curtain, shades, gates
 - HVAC, air-conditioner
 - Audio/video
 - Sensors, video monitoring
 - Smart and automatic scenario
- **Anytime, anywhere:**
 - Touch panel
 - iPhone/iPad/Android

Smart Government IP Network Architecture

Pure IP network to provide integrated services for:

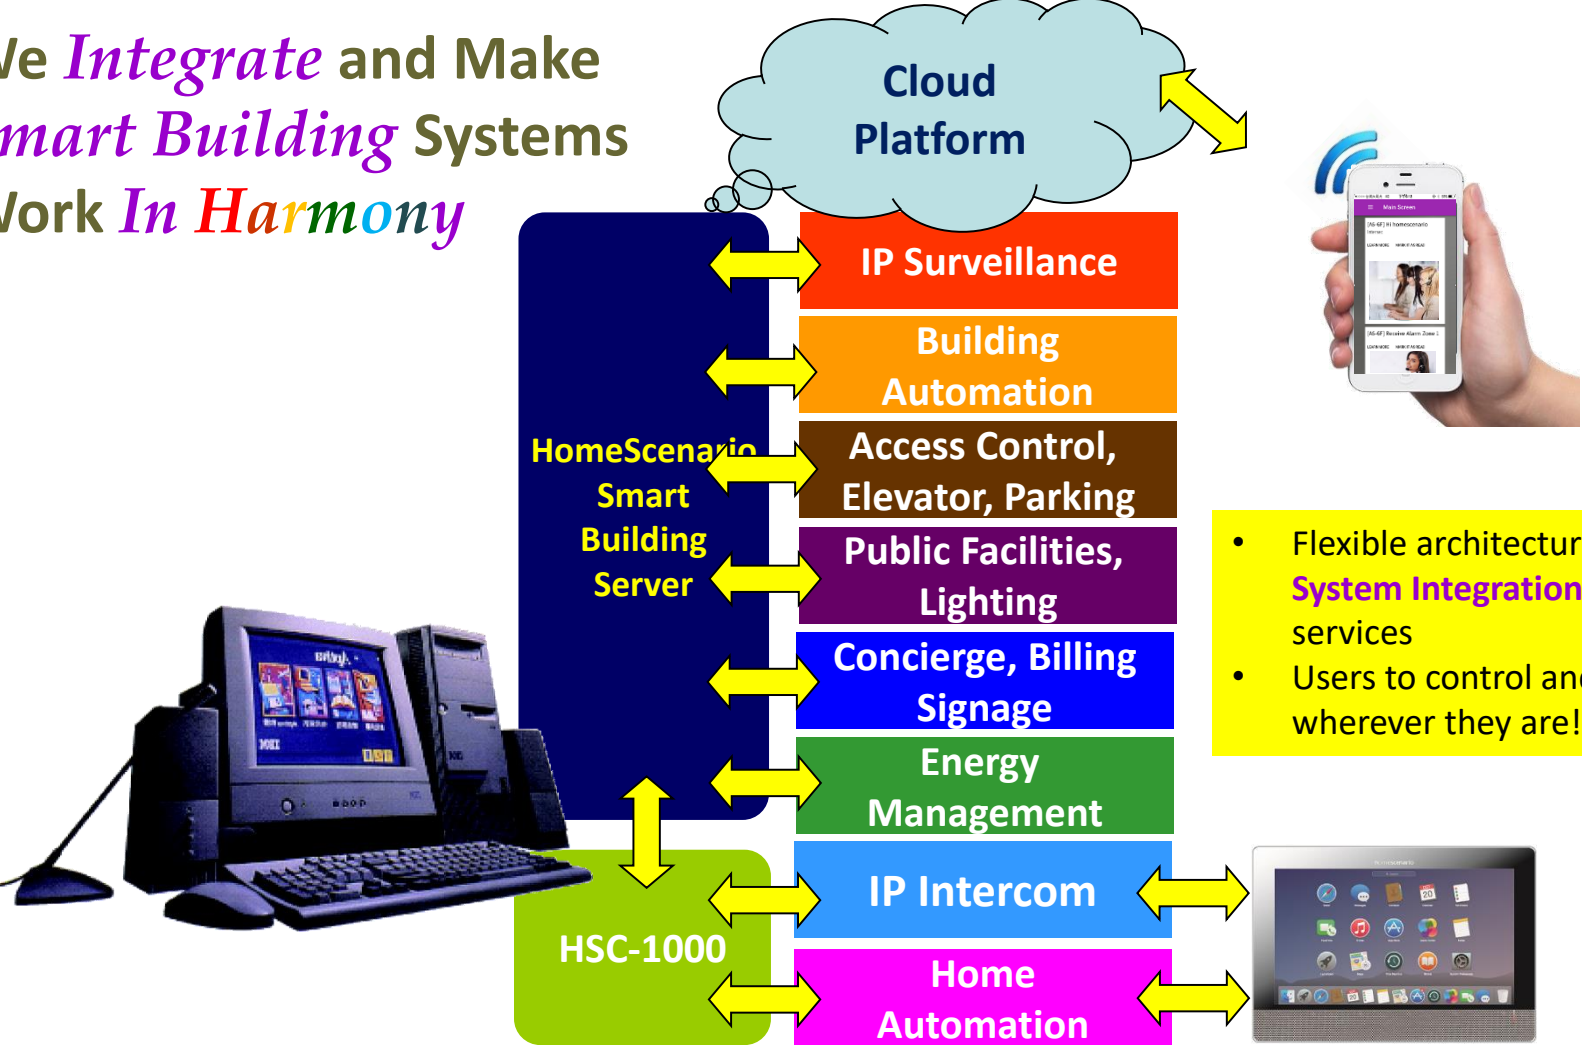

- Intercom
- Alarm
- Access Control
- Video Monitoring
- Energy Mgmt.
- Concierge
- Smart Home

The Government Systems

- Systems to be properly integrated
- Unified control interface
- Controlled anywhere
- Collecting real-time information such as power metering, sensor status, video recording
- Auto send notification or trigger preset scenario

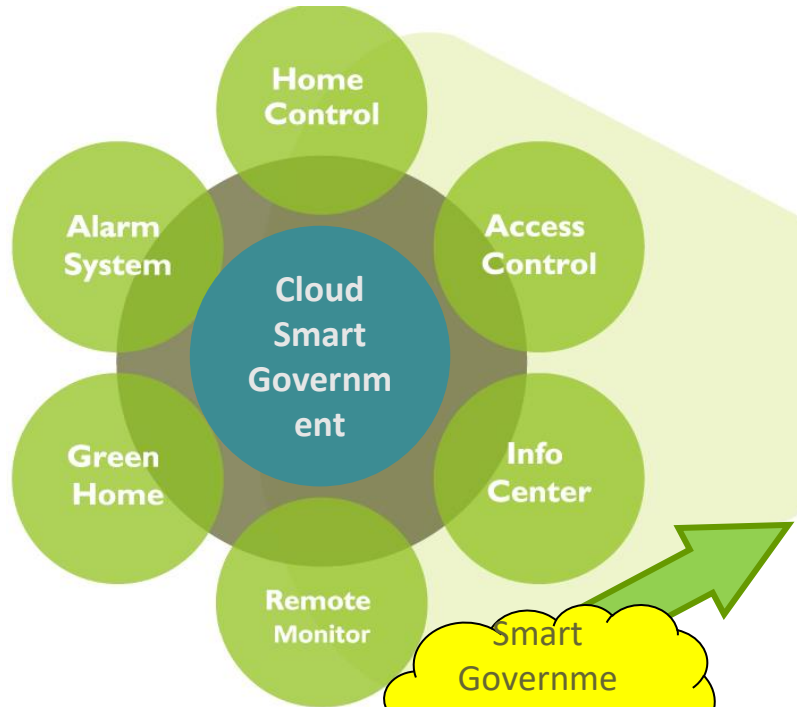

We Integrate and Make Smart Building Systems Work In Harmony

- Flexible architecture to facilitate 3rd party System Integration for smart building services
- Users to control and always get informed wherever they are!

User Interfaces

- *Multi-functional integration*
- *Fully customized scenarios and user interfaces*
- *Easy to deploy, wired and wireless*
- *Notified, monitor and control from anywhere*

Smart AIoT Government via LINE@

- App “without App”
- PUSH message upon alarm or service
- Multiple user registration for one Government
- Features:
 - Alarm arm/disarm
 - Smart control
 - Call guard
 - Monitor video
 - Receive service information
 - Photo album
 - Access control
- Flexible Operation
 - Function button
 - Dialog flow
 - Web UI
 - Integration with 3rd party service

Smart Government *Intercom* Applications

Smart Building
Server

HomeScenario
Cloud Server

Indoor Touch
Panel

Message
Service

iPhone/Android
App

- Messages being pushed to intercom touch panel and iPhone/Android App simultaneously via HomeScenario Cloud:
 - Security & alarm notification
 - Service info
- Message contents including:
 - Title
 - Text info
 - URL link (click to pop up)
 - Photo/snapshot

Multiple Sensor Zone Protection

Intercom touch panel is also the
Alarm Control Panel

Multi Access Control:

RFID, QR Code, LPR, Face

User database and condition settings

Smart Building Server

Event Report

Database Sync

(LAN)

HBT-820D
IP Outdoor Station

HBE-700D
IP Public Intercom Station

HBR-300
IP Access Controller

- Via IP network, system supports various intercom stations and access controller
- Can be expanded to cover biometrics e.g. face recognition and fingerprint
- Each user can be granted with individual permission according to ID, time, condition, etc.
- System can be applied to door access, elevator control, parking etc.
- Server can update user database and synchronize to access controller; stored at equipment storage it can work online or offline

Smart home made easy!

Building Blocks

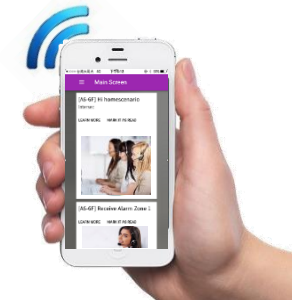

- Power meter
- Water meter
- Gas meter
- Air quality e.g. PM 2.5
- Temperature & humidity
- Light luminance
- RPM, mileage
- etc.

- Statistics, charts, comparison tables, histograms
- 24x7 pricing table
- Policies, benchmarks, conditions
- Automation, control, scenario activation
- etc.

- User-based accounting system
- Prepayments/receivables, wallet balance
- Cloud back-up
- Cloud message notification
- etc.

Application Diagram

iPhone/Android App

Application Introduction

homescenario

- **Real-time smart metering & display, e.g.:**
 - Power meter
 - Water meter
 - Gas meter
- **Energy consumption statistics:**
 - Histogram (daily, weekly, monthly) for whole building or selected units/zones
 - Average, ranking, etc.
- **Cost calculations according to 24x7 pricing table**
- **Billing and prepayment system**
- **Cloud-based push message service**
- **Smart control:**
 - Lighting on/off/dim
 - Air-conditioner
 - Water valve
 - Gas valve
- **Integrated user interfaces:**
 - PC monitor in management Government
 - Touch panel in each room/zone
 - iPhone/Android App

Smart Government Feature Summary

homescenario

Smart home made easy!

Integrated Features

- **SIP/IP Intercom:**
 - Indoor station vs. outdoor video phone
 - Indoor station vs. video doorbell
 - Door to door intercom
 - Call mgmt. center operator
 - Forward incoming call to *iPhone/Android anywhere*
- **Access Control:**
 - Indoor station or mgmt. console to unlock door during intercom
 - Centralized management access control via *Mifare RFID*
 - *Elevator* floor access control, call elevator
- **Alarm System:**
 - System arm/disarm
 - Instant alert to mgmt. center
 - Instant siren alert
 - (Optional) Instant alert to homeowner via e-mail/SMS or *iPhone/Android* pushed message

Integrated Features (cont'd)

- **Information Feeds:**

- Publish news/alerts/announcements from mgmt. center, to ALL or SELECTED *indoor touch panel or iPhone/Android*
- Updated temperature, weather conditions, etc.

- **Smart Home Automation:**

- Home controls:
 - Lighting on/off/dim
 - Appliance on/off
 - Window shades
 - Thermostats
 - Audio/video
- *Scenario* control; one touch does it all
- Control via indoor station, *iPhone/iPad/Android*

- **Control *Anywhere*:**

- Via *3G/4G, Wi-Fi or internet*
- SMS/email notification
- Camera video monitoring

Integrated Features (cont'd)

● Energy Management:

- Always collects energy consumption values via digital meters such as *Power, Water, Gas*
- Reports energy metering information:
 - *Real-time* energy consumption
 - *Histogram* chart (daily, weekly, monthly etc.)
 - *Comparison* table
 - Others
- Sets benchmark value and sends *alert* notification if real-time value over benchmark
- *Controls* equipment or appliance to reduce energy consumption, e.g.:
 - Lighting
 - Air-conditioner
 - Gas valve
 - Water valve/pump
 - Etc.
- Prepares *billing and accounting*:
 - Prepayment
 - Balance check and notification

Smart Government *Building*
Automation

homescenario

Smart home made easy!

Building Automation System Architecture

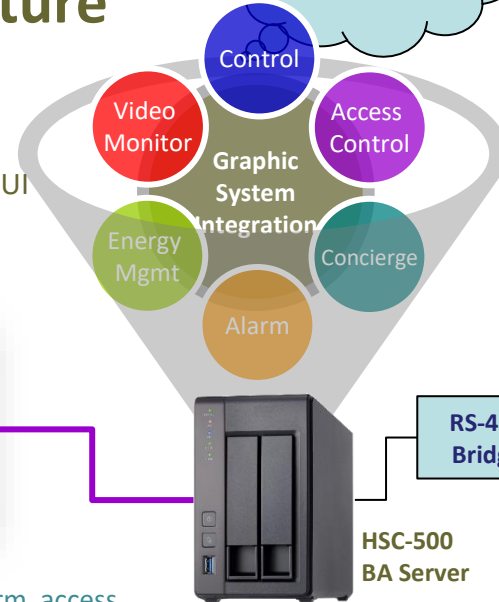

Control and monitor from anywhere

Centralized Monitoring

(web-based, smart scenario automation with customized UI and animated graphics over electronic floor plan or map)

RS-485 Bridge

RS-485

HBD-100

HBA-200

- Real-time security alarm, fire alarm, access control, intercom event/activity notifications
- Monitoring status for various facilities e.g. water pump, oil tank, diesel generator etc.
- Sensor status around the building
- IP camera video-on-demand
- Automatically controls lighting, garage gate, HVAC, etc.

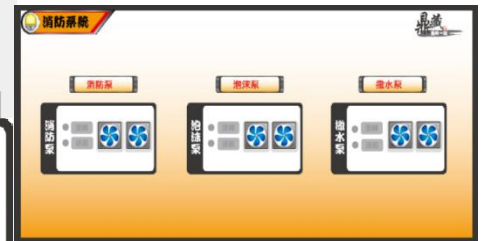

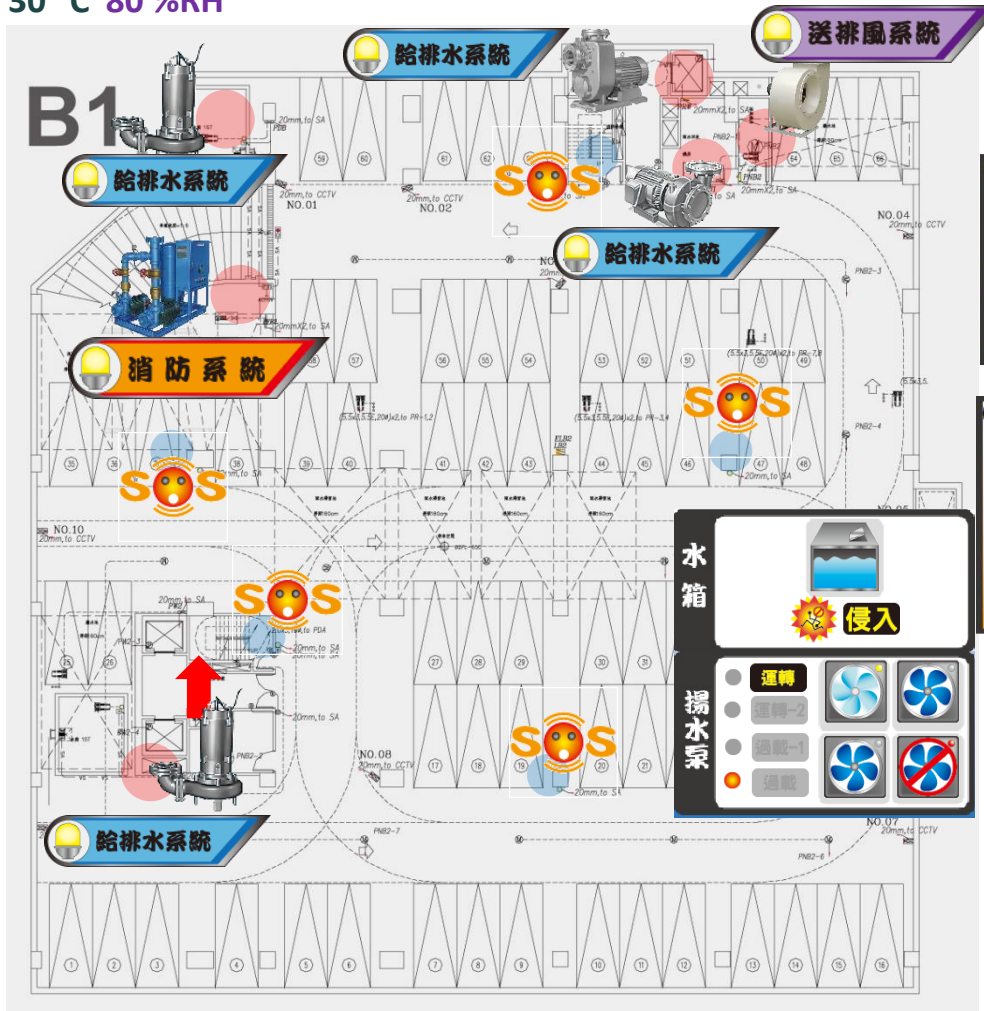

Building Facilities & Equipment

30 °C 80 %RH

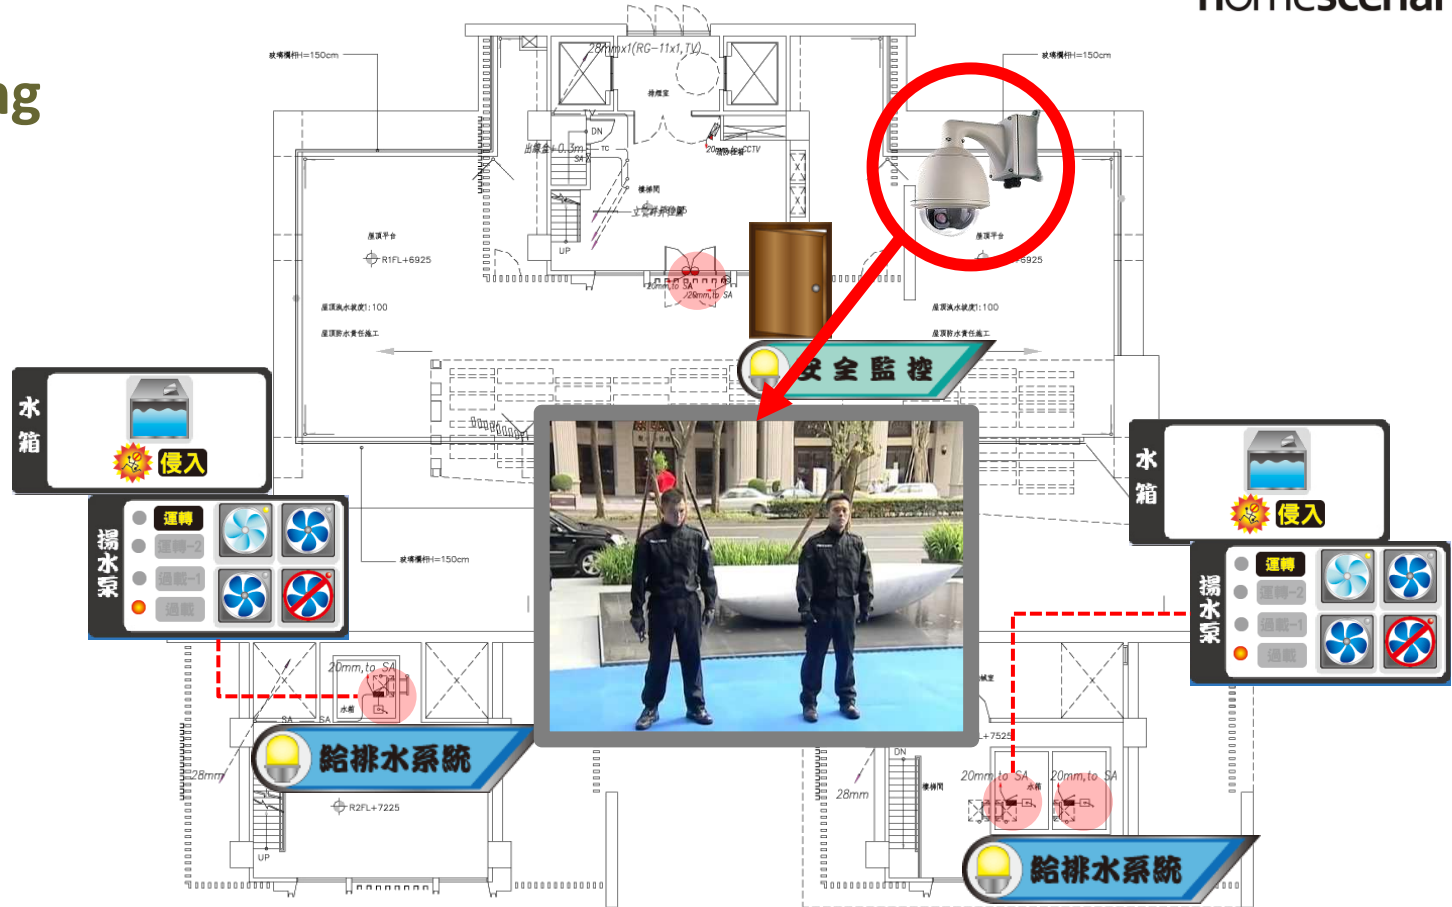

Alarm & Facility Maintenance Application

- Equipment real-time operation status
- Environmental parameters (e.g. temperature, humidity, luminance, air-quality etc.)
- Resource (e.g. water, oil) stock level and auto adjustment
- Sensor or panic button alarm notification

Access Control, Camera Monitoring Application

- Watch camera video on-demand
- Integration with building access control & fire alarm system
- Unlock door on-screen

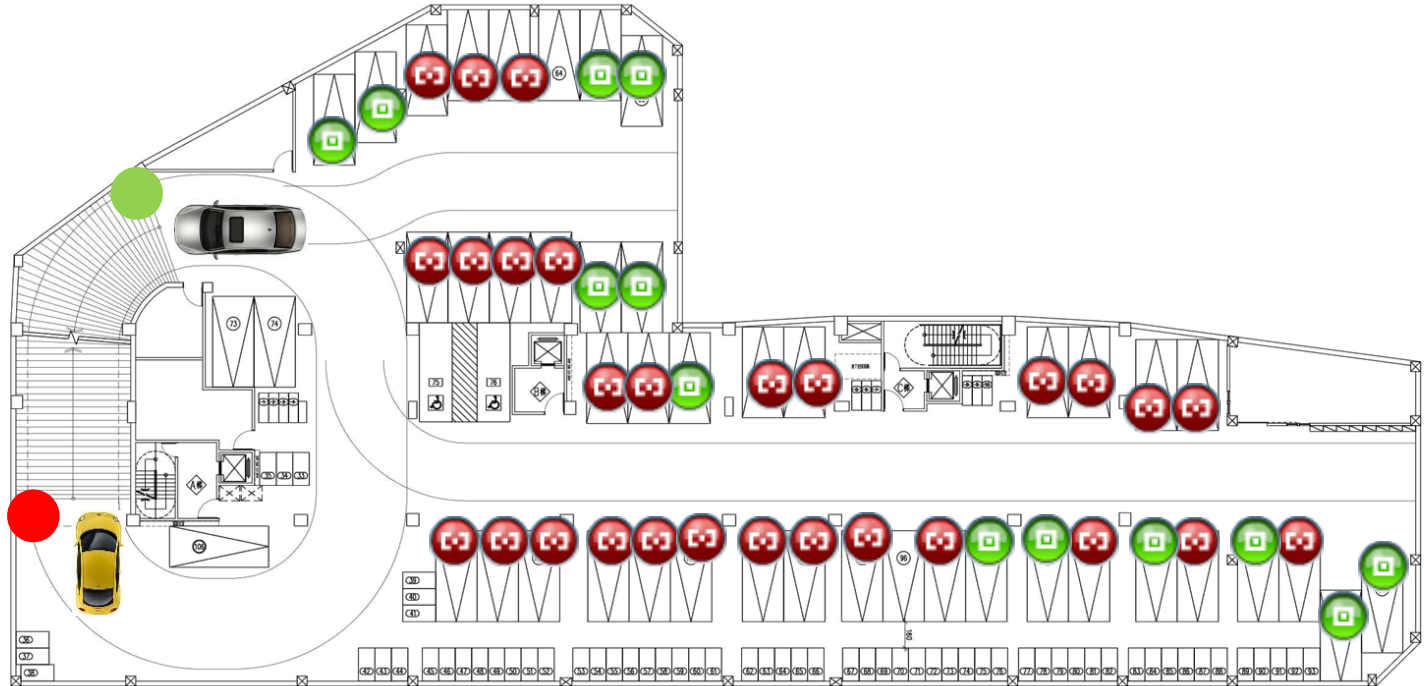

Integration with Intercom, Alarm, Access Control

- Intercom parties and status
- Alarm arm/disarm status
- Door open/close status
- Floor position of elevator, control elevator

Parking Space Management

- Real-time parking space availability
- Traffic light guidance for parking entrance and pass way

Main Products

homescenario

Smart home made easy!

IP Video Doorbell

HBE-100C

Features	Technical Spec
<ul style="list-style-type: none">• Wide angle, high quality CMOS camera• Elegant industrial design with painted ABS frame and tempered glass front panel; which can well fit various interior design styles• Wall-mount 1-gang installation, slim outlook thickness• Supports IP network, works with HBE-200/310 indoor stations• LED illumination during intercom for night vision• Automatic snapshot during intercom for further verifications• Indoor station can monitor camera video from HBE-100C• Embedded RFID reader for controlling door lock or security alarm arm/disarm	<ul style="list-style-type: none">• Power 12-24V DC• Camera CMOS wide angle• Op. Power 4.5W• Standby 0.5W• RFID Mifare 13.56MHz• Network RJ-45 Ethernet• I/O Lock/Open• Installation 1-Gang• Protection Indoor/Outdoor• Materials Painted ABS frame, with glass-type front panel

10.1" IP Indoor Station

HBE-200 (7")

HBE-310 (10.1")

Features	Technical Spec
<ul style="list-style-type: none"> • 7" or 10.1" LCD with capacitive touch panel • Elegant, slim industrial design with painted ABS frame and tempered glass front panel • Integrated features: alarm (8 zones), intercom, monitoring, message service, home automation • Integrated access control such as door lock, elevator floor control • Video intercom with video doorbell, outdoor intercom station, intercom console, and other indoor stations in the same network • Monitors video from video doorbell, outdoor station, CCTV/DVR or IP camera (via HBI-VS) • Displays information messages • Home automation user interfaces for controlling lighting, thermostats, window shades, audio/video, etc. 	<ul style="list-style-type: none"> • Power 12-24V DC • Display 7" or 10.1" TFT LCD • Touch Panel Capacitive • Network RJ-45 Ethernet • Alarm Input 8 zones • Siren Output 1x (optional) • Serial RS-485 (optional) • Installation Wall-mount • Protection Indoor • Materials Painted ABS frame, tempered glass front panel

Smart Home Control Gateway

HBC-100

Features	Technical Spec
<ul style="list-style-type: none">• Can expand RS-485 for wired smart home control• Also supports Z-Wave 2-way mesh networking, RF range up to 30m indoors• Provides digital input/output connections• Controls various home systems, e.g. light switch, thermostat, door access, window shades, security monitoring, A/V equipment, as well as scenarios• Controls via iPhone/iPad/Android/intercom touch panel• Always updates system status and allows controlling from anywhere via HomeScenario AIoT Cloud Platform• Works with central management server for large scale deployment with HomeScenario Smart Building System	<ul style="list-style-type: none">• Power 12V DC• LAN RJ-45 Ethernet• Wireless Wi-Fi/Z-Wave• Installation Desktop• DI 4x• DO 1x• Serial RS-485 (USB)• Program Button for device program/association and Government reset

Smart Home I/O Module

HBA-200/210

Features	Technical Spec
<ul style="list-style-type: none">• Supports RS-485/Modbus for wired smart home control• Provides 8 NC/NO relay outputs with high rating, which can be used to control lighting on/off or window curtain• Can be used to switch load of AC or DC• Max loading (each load): Resistive 20A x4, 10A x4• Also provides 8-channel digital inputs, which can be connected with sensor or scenario button• DIN-Rail installation	<ul style="list-style-type: none">• Serial RS-485• Digital Input 8x digital inputs, terminal blocks• Relay Output 4x 20A, 4x 10A COM/NC/NO; terminal blocks• N Neutral wire, for power status detection• Installation DIN-Rail• Dimension 155x110x60mm

IR Control Station

HSK-250Z

Features	Technical Spec
<ul style="list-style-type: none"> Receives commands from gateway and transmits IR signals, either by internal IR transmitter, or IR emitter cable (HSK-10) Embedded with IR database for A/V system Supports IR code learning for A/V and HVAC systems RiteON™ technology which auto detects equipment on/off status by connecting with the power detector, so as to assign the exactly correct IR command pre-defined by scenario When acting as a host controller, arranges scenarios for lighting, AV system, projector screen, window shades, thermostat Supports RS-485 for connecting with host controller You can use iPhone/iPad/Android or IP intercom touch panel to easily control, from anywhere 	<ul style="list-style-type: none"> Power 12V DC Connection Z-Wave Frequency 32-500KHz IR Blaster IR LEDs for 270° transmission, 5m range IR Cable Via 3.5mm phone jack

Guard Station

HBI-1100 (10.1")

IR Control Station

HSK-250Z

Features	Technical Spec
<ul style="list-style-type: none"> • Receives commands from gateway and transmits IR signals, either by internal IR transmitter, or IR emitter cable (HSK-10) • Embedded with IR database for A/V system • Supports IR code learning for A/V and HVAC systems • RiteON™ technology which auto detects equipment on/off status by connecting with the power detector, so as to assign the exactly correct IR command pre-defined by scenario • When acting as a host controller, arranges scenarios for lighting, AV system, projector screen, window shades, thermostat • Supports RS-485 for connecting with host controller • You can use iPhone/iPad/Android or IP intercom touch panel to easily control, from anywhere 	<ul style="list-style-type: none"> • Power 12V DC • Connection RS-485 • Frequency 32-500KHz • IR Blaster IR LEDs for 270° transmission, 5m range • IR Cable Via 3.5mm phone jack

HomeScenario Solution Advantage

- Flexible, scalable, powerful
- Well integrated *smart building* solution: *IP intercom, alarm, access control, surveillance, home automation*
- *Cloud-based*, can be accessed and controlled *from anywhere* via the Internet
- *Wired & wireless* control technologies, flexible installation per project requirements
- Open architecture for cloud system, easy to *integrate* value-added services/systems and *maintain*
