About HomeScenario

HomeScenario, Inc. offers cloud-enabled Smart Building systems converging IP Intercom, Alarm, Access Control, Video Surveillance, Home Automation, Audio/Video, and Energy Management. Using advanced technologies of wired/wireless control and IP networking, the HomeScenario solutions make comfort, convenience, safety, security, and eco-friendliness available for large-scale premium projects such as residential MDU/MTU, hotel, office, factory, school dormitory, etc. On the other hand, we provide very good solutions for customized installations, e.g. villa, luxury house, meeting room, and home theater.

For years, HomeScenario has been Asia's leading provider for Smart Home application with a number of successful cases deployed in various regions. This includes automation of lighting switch, LED dimmer, window curtain, garage gate, air-conditioner, audio/video, sensor, power meter, IP camera surveillance, and more. All of them can be accessed, monitored and controlled easily through wall button, portable remote, smart phone, tablet, intercom touch panel, or PC, from anywhere via the Internet. HomeScenario boasts its flexible platform which allows integration among systems and customizations for scenario and user interface.

For system integrators and installers, HomeScenario solutions provide great features, performance, and flexibility at reasonable costs. For homeowners and users, their life can be made easier with peace of mind, no matter they are at home or away from home.
